CERTIFIED MAIL--RETURN RECEIPT REQUESTED

Dr. Eugene R. Mancini
Environmental and Regulatory Affairs
Atlantic Richfield Company
515 South Flower Street
Los Angeles, CA 90071

Dear Dr. Mancini:

Re: November 16, 1988 Letter, William C. Rusnack to
Brack W. Duker, Regarding ARCO Cost Sharing on
"Carbon Paste Plant Exhauster"

Re: Letters to You on December 22, 1988; May 23, 1989;
January 1, 1990; Regarding Work Progress

Work on the referenced Carbon Paste Plant Exhauster project is about 97% complete. The cost summary (attached) shows expenditures to date of \$202,882. Work remaining is estimated at \$4,000-\$6,000 and centers on minor work in the category of dust control to the mixer feed screws.

The system is in full operation. We had an inspection of the system by Mr. Harry Keltz, of the Air Quality Bureau of the Montana Department of Health and Environmental Sciences, on July 12, 1990. Mr. Keltz' verbal comments were that the system meets all opacity and collection efficiency requirements.

Since the project is essentially complete and has exceeded \$200,000, CFAC would like to be reimbursed \$100,000, as previously agreed to by ARCO. If additional documentation is required, please let me know.

Sincerely,

T. F. Payne
Technical Manager
